EDUCATION

The Hong Kong Polytechnic University

Master of Design in Intelligent Systems Design

Hong Kong

09/2026-06/2027

School of Visual Arts

Bachelor of Fine Arts in Design

GPA: 3.85 / 4.0

Core Courses: Multimedia Design, Interaction Design, Data Visualization

New York

09/2019-05/2023

RESEARCH & WORK EXPERIENCE

MM-Hand (Dexterous Robotic Hand Project)

Shenzhen, China

Product Hardware Assistant

04/2026-Present

- **Structural Design:** Designed and assembled the dexterous palm body, CMC joints, encoder fixtures, and modular motorhub; defined joint limits and configured URDF parameters to align physical hardware with software simulations.
- **Routing & Transmission:** Engineered high-density tendon routing within space-constrained palm structures to resolve interference; utilized 3D-printed prototypes for physical validation and closed-loop tolerance design.
- **Standardization:** Compiled comprehensive SOPs for the multi-sensor integrated hand, standardizing wiring, calibration, and assembly pipelines; optimized DFM workflows through prototype execution.

New York Bird Supply

New York, USA

Website Designer

09/2022-05/2024

- **UX Optimization:** Upgraded e-commerce interaction logic and optimized user flows to enhance system efficiency; collaborated with developers for code-level implementation and performance optimization.

SKILLS

Prototyping

- **Hardware & Design:** Fusion 360 (Mechanical Design), Tendon Routing, DFM, SOP Compilation, Embedded Systems (ESP32 / Arduino), Pneumatic Actuation
- **Programming & Systems:** C++ / Python (Hardware), JavaScript (React / Tailwind); PVE (Proxmox), Local LLM Deployment (Ollama / Qwen).
- **Interaction & Visuals:** User Flow Mapping, HCI Theory, Figma, Adobe Suite (AE / PR / PS / AI), QGIS.
